PROFILE

Aspiring student at Chitkara University with strong interests in machine learning, data analysis, and full-stack development. Experienced in building real-world projects using Python, Node.js, Django, and modern web technologies, with a focus on applying AI and physics-based models to practical problems. Skilled in C++, Java, UI/UX design, and backend development, with strong communication and problem-solving abilities.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering (AI & ML)

Chitkara University, Punjab

2024 - 2028 (Expected)

CGPA: 8.67 (Till Date)

SKILLS

- Data Analysis & Machine Learning (Python)
- Beginner-to-Intermediate level DSA in C++, Java
- Graphic Designing
- Strong hold on UI/UX and Front-End
- Backend in Flask, Django
- Great communication & presentation skills

LANGUAGE

- English
- Hindi

PROJECTS

Aero-Velocity | F1 Analyser & Simulator Machine Learning Project

[Github](#)

- The project analyses aerodynamic components with real physics calculations.
- Predict lap times using ML models trained on actual F1 data.
- Generating AI-powered insights and recommendations.
- Bridges the gap between theoretical physics, real-world F1 data, and artificial intelligence to deliver actionable aerodynamic insights in real-time.
- Made with Node.js and Python (Machine Learning).

CureClick | Appointment Booking & Pharmacy Web Development Project

[Github](#)

- A comprehensive healthcare platform that combines an online pharmacy service with doctor consultation booking.
- Made using HTML, CSS, JavaScript & Bootstrap (Front-End) and Django (Backend).
- Basically enables users to manage their healthcare needs in one place.

ACHIEVEMENTS & CERTIFICATIONS

- **Top 5 in Formula Hacks 2025** officiated by Notion & Google Developers Group
- **Microsoft Certified** AI-900, AZ-900, DP-900 (Microsoft)
